DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kunkel et al. with Patent Number 5,961,6031 in view of Vaid et al. with Patent Number 6,119,235.
- 3. Regarding claim(s) 1, 4-8, 14-16, 20-22, 25-29, Kunkel teaches a database communication network. Kunkel teaches *prefetching Internet resources* at col. 5, lines 1-5.

Kunkel teaches the invention in the above claim(s) except for explicitly teaching fetching data dependent on round trip times and data size.. In that Kunkel operates to obtain data resources from the Internet the artisan would have looked to the Internet database arts for details of implementing prefetching of data. In that art, Vaid, a related database network, teaches a system to schedule downloading of data in order to provide optimized computer usage. Vaid specifically teaches "estimating a bit rate over a round-trip-time between the data source and the data receiver", abstract. Further, Vaid suggests that savings will result from implementing his downloading system. The motivation to incorporate limits on downloads insures that user limits are respected. Thus, it would have been obvious to one of ordinary skill in the art to incorporate the time and capacity limits as taught in Vaid into the prefetching system described in Kunkel because Kunkel operates with data constraints and Vaid suggests that optimization can be

obtained when data limitations are respected Therefore, by the above rational, the above claims are rejected.

- 4. Regarding claims 2 and 18, Kunkel teaches *parallel fetching* at col. 5, lines 28-29. Thus, the above claim limitations are obvious in view of the combination.
- 5. Regarding claims 3, 10 and 19, Kunkel teaches *prefetching based on previous accesses* at col. 5, lines 57-60. Thus, the above claim limitations are obvious in view of the combination.
- 6. Regarding claims 9, Kunkel teaches *termination of prefetching* at col. 13, lines 29-31. Thus, the above claim limitations are obvious in view of the combination.
- 7. Regarding claims 11-13 and 23-24, Kunkel teaches *filtering data* at col. 5, 7, 8, lines 65-67, 59-63, 6-10. Thus, the above claim limitations are obvious in view of the combination.

Conclusion

- 8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure is disclosed in the Notice of References Cited.
- 9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephan Willett whose telephone number is (703) 308-5230. The examiner can normally be reached Monday through Friday from 8:00 AM to 6:00 PM.
- 10. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Rinehart, can be reached on (703) 305-4815. The fax phone number for the organization where this application or proceeding is assigned is (703) 305-9731.
- 11. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-9605.
